Joann/Tom,

Enclosed are the two revised proposals for the sampling and abandonment of Wells BL-5 through BL-8 (6 sheets) and Well TMW-17 (6 sheets) for the ILM/LMC Facility and Boeing C-6 Facility. The costs have generally been divided as an 80 percent/20 percent split between the two projects.

The additional costs primarily reflect the addition of a groundwater sampling crewmember, the increased generation of wastewater from pump decontamination, additional sample analyses for dissolved hexavalent chromium, and replacement of the pump hose between wells. We plan to collect the groundwater samples on January 14 and to abandon the wells on January 17 and 18, 2000.

The proposal originals will follow in the mail. Please call if you have any questions or comments.

Regards,

Mark Clardy
